ABOUT ME

Passionate and detail-oriented Front-End Developer with a strong foundation in React.js and modern web development practices. Skilled in translating design ideas into functional, responsive interfaces, I thrive on building user-centric experiences. I bring creative design insights from tools like Figma and Canva, paired with a problem-solving mindset and a love for clean, efficient code.

I have also contributed to the development of a full-scale ERP system, where I played a key role in building intuitive front-end interfaces, integrating modules, and ensuring seamless user interactions.

SKILLS

- React.js (Functional Components, Hooks, Context API)
- JavaScript (ES6+), HTML5, CSS3 Bootstrap, Tailwind CSSFinancial
- Canva – Quick UI Mockups, Graphic Design for Web Elements
- Git, GitHub, VS Code, Chrome DevTools
- Creative problem-solving
- Team collaboration and communication

WORK EXPERIENCE   2024 - Present

⚙ **NewStar Infotech**

Front-End Developer

Crafting responsive, high-performance UIs for ERP systems and websites. I convert Figma designs into production-ready React apps with pixel-perfect precision.

ERP UI Development
Built clean, intuitive interfaces for modules like Task, Inventory, Sales & Admin using React.js. Integrated seamlessly with REST APIs.

Figma to React
Converted Figma designs into responsive, cross-browser compatible websites using React, Tailwind/Bootstrap, HTML, and CSS.

Tech Stack
React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind, Bootstrap, jQuery, Git, VS Code, Figma.
